

Single Upload Schools

Current List (as of 10/2017) of nursing programs that submit 100% of student demographic and health information to ProMedica's Center of Nursing Excellence when the student enters their first clinical semester in the program (regardless of placement at a ProMedica site). Access to ProMedica's IT network will be granted for 2 ½ years from this date. Students that need additional time to complete program requirements may be extended after confirmation by the school. Additional computer access to required programs (such as EMR) will be granted based on educational need and completion of training requirements typically associated with their first clinical at a ProMedica site.
